Email: [adenyusuf332@gmail.com](mailto:adenyusuf332@gmail.com) Phone: 905551987870 [Portfolio](#). [GitHub](#). Istanbul, Turkey

## EDUCATION

---

Amoud University, Bachelors of IT (discontinued)

2019-2021

Istanbul Arel University, Bachelors of Computer Engineering

2021-Present

## PERSONAL PROJECTS

---

### Setup Spot: [Live](#) [GitHub](#)

- Develop a comprehensive MERN stack application with React for the frontend, utilizing Redux Toolkit for state management.
- Implement Express Node backend with MongoDB for seamless CRUD operations, allowing users to share gaming, podcast, and streaming setups.
- Enhance user experience with dynamic interfaces and interactions while enabling users to post, read, update, and delete content effortlessly.

### Personal Portfolio: [Live](#) [GitHub](#)

- Create a dynamic portfolio website using React to showcase your diverse projects and skills.
- Incorporate the Intersection Observer API for engaging animations that trigger as users scroll, enhancing visual appeal.
- Present your work elegantly, combining React's versatility with animated interactions to leave a lasting impression on visitors.

### Clothing e-commerce: [Live](#) [GitHub](#)

- Develop a robust web application using React for the front end, Redux for state management, and Firebase for both data storage and user authentication.
- Implement secure user sign-up and sign-in functionality, leveraging Firebase's authentication services.
- Utilize Redux to efficiently manage and synchronize application-wide states, providing a seamless and responsive user experience.

### Weather App: [Live](#) [GitHub](#)

- Dynamic Weather UI: Build a responsive weather website using React, offering real-time updates and interactive features for an engaging user experience.
- API-Powered Data: Integrate a weather API to fetch and display current conditions and forecasts, enhancing the site's functionality and accuracy.
- User-Friendly Design: Create an intuitive interface with modular React components, ensuring easy navigation and seamless adaptation to various devices.

## SKILLS

---

- Programming Languages: React, Javascript, HTML, CSS, Python, SQLite, Node Js, Express Js, MongoDB
- Tools: Redux, Jest

## LANGUAGES

---

- English
- Arabic
- Somali
- Turkish
