EXPERINCE & PROJECTS

Web Project Administrator - Erasmus Student Network (ESN) -

Sep 2024 - Present

A volunteering group for Erasmus exchange students at Istanbul Arel University Branch

- Managed and updated the ESN wiki to ensure all information was accurate and up-to-date for members.
- Coordinated and uploaded the latest events, news, and announcements to the ESN website.
- Collaborated with the team to improve web functionalities, ensuring a smooth user experience for university students participating in the ESN community.

Apartment-seeker: [Live](#) | [GitHub](#)

Nov 2023 - Feb 2024

A full-stack web app where you can post and search for apartments and also chat with the post owners

NodeJs | MongoDB | ExpressJs | ejs | Bootstrap |
PassportJs | Socket.io

- Created frontend with EJS and Bootstrap, integrating Mapbox maps to facilitate locating posts based on desired locations.
- Developed an Express Node backend with MongoDB for seamless CRUD operations, enabling users to register, login, post, and edit content.
- Integrated real-time chat functionality using Socket.IO and stored messages in MongoDB.

Setup-spot: [Live](#) | [GitHub](#)

Aug - Sep 2023

A web app where users can share setups of their gaming, podcast, and streaming setups

React | NodeJs | MongoDB | ExpressJs | Redux | HTML |
CSS | PassportJs

- Developed a comprehensive MERN stack application with React for the frontend, utilized Redux Toolkit for state management.
- Implemented an Express Node backend with MongoDB for seamless CRUD operations, allowing users to share gaming, podcast, and streaming setups.
- Enhanced user experience with dynamic interfaces and interactions while enabling users make CRUD operations effortlessly.

Clothing e-commerce: [Live](#) | [GitHub](#)

Sep - Nov 2022

Single page e-commerce website which uses a firebase backend and redux toolkit

React | HTML | SCSS | Firebase | Redux

- Developed a robust web application using React for the front end, Redux for state management, and Firebase for both data storage and user authentication.
- Implemented secure user sign-up and sign-in functionality, leveraging Firebase's authentication services.
- Utilized Redux to efficiently manage and synchronize application-wide states, providing a seamless and responsive user experience.
