Back End| NodeJs, MongoDB, SQLite, ExpressJs, Python, C++, Python
Testing/Deployment| Jest, Netlify
Developer Tools| Git, npm, Agile Methodology, Postman

PROJECTS

Apartment-seeker:Live|GitHub   Nov 2023 - Feb 2024

A full-stack web app where you can post and search for apartments and   NodeJs | MongoDB | ExpressJs | ejs | Boostrap |
also chat with the post owners   PassportJs | Socket.io

- Created frontend with EJS and Bootstrap, integrating Mapbox maps to facilitate locating posts based on desired locations.
- Developed an Express Node backend with MongoDB for seamless CRUD operations, enabling users to register, login, post, and edit content.
- Integrated real-time chat functionality using Socket.IO and stored messages in MongoDB.

Setup-spot:Live|GitHub   Aug - Sep 2023

A web app where users can share setups of their gaming, podcast,   React | NodeJs | MongoDB | ExpressJs | Redux | HTML |
and streaming setups   CSS | PassportJs

- Developed a comprehensive MERN stack application with React for the frontend, utilized Redux Toolkit for state management.
- Implemented an Express Node backend with MongoDB for seamless CRUD operations, allowing users to share gaming, podcast, and streaming setups.
- Enhanced user experience with dynamic interfaces and interactions while enabling users make CRUD operations effortlessly.

Personal Portfolio:Live|GitHub   Feb - Mar 2023

React Personal Portfolio   React | HTML | CSS

- Created a dynamic portfolio website using React to showcase my diverse projects and skills.
- Incorporated the Intersection Observer API for engaging animations that triggered as users scrolled, enhancing visual appeal.
- Presented my work elegantly, combining React's versatility with animated interactions to leave a lasting impression on visitors.

Clothing e-commerce:Live|GitHub   Sep - Nov 2022

Single page e-commerce website which uses a firebase backend and redux toolkit   React | HTML | SCSS | Firebase | Redux

- Developed a robust web application using React for the front end, Redux for state management, and Firebase for both data storage and user authentication.
- Implemented secure user sign-up and sign-in functionality, leveraging Firebase's authentication services.
- Utilized Redux to efficiently manage and synchronize application-wide states, providing a seamless and responsive user experience.

Weather App:Live|GitHub   Nov - Nov 2022
