EDUCATION

The George Washington University

Master of Science in Computer Science

Istanbul Arel University

Bachelor of Science in Computer Engineering

Washington, D.C.

Aug 2025 – May 2027

Istanbul, Turkey

Oct 2021 – Jun 2025

EXPERIENCE

Software Engineer

B Tech Analytics Technology

May 2025 – Aug 2025

Istanbul, Turkey

- Developed a data-intensive BI platform using **SolidStart** and **Apache ECharts** to support large-scale analytics workflows and interactive dashboards.
- Improved backend scalability and reduced query latency by **45%** through migration from **SQLite** to **DuckDB**.
- Designed optimized data processing pipelines enabling efficient querying and visualization of high-volume datasets.
- Collaborated on frontend and backend system integration to deliver performant, production-ready analytics features.

Software Engineer Intern

B Tech Analytics Technology

Feb 2025 – May 2025

Istanbul, Turkey

- Refactored frontend architecture using **TypeScript** and **TailwindCSS**, improving application performance by **25%**.
- Engineered an automated PNG-to-WebP asset pipeline reducing frontend load times by **50%**.
- Improved maintainability and UI consistency by restructuring reusable frontend components and styling workflows.

PROJECTS

Eco Transcribe | *React Native, Spring Boot, FastAPI, Docker, PostgreSQL, MongoDB*

Jan 2025 – Jun 2025

- Built a distributed microservices-based application for real-time audio processing and NLP workflows.
- Developed scalable backend services using **Spring Boot** and **FastAPI** with RESTful API communication between services.
- Integrated **PostgreSQL** and **MongoDB** for persistent storage and efficient handling of structured and unstructured data.
- Containerized services with **Docker**, improving deployment consistency, scalability, and development efficiency.

Multithreaded Image Processing Application | *C++*

Mar 2024 – May 2024

- Implemented a multithreaded image processing system achieving **78%** faster execution through parallelized workloads.
- Applied concurrency concepts including thread synchronization, workload partitioning, and CPU-bound optimization.
- Designed scalable processing pipelines demonstrating strong systems programming and parallel computing fundamentals.

Apartment Seeker | *Node.js, Express, MongoDB*

Jan 2024 – Mar 2024

- Developed backend services using **Node.js** and **Express** with RESTful APIs and MongoDB integration.
- Implemented authentication, CRUD operations, and persistent data management for a full-stack apartment listing platform.
- Designed modular backend architecture improving maintainability and scalability of application features.

TECHNICAL SKILLS

Languages: Java, C, C++, Python, JavaScript (ES6+), TypeScript, SQL, Kotlin, HTML, CSS

Frameworks & Technologies: React, React Native, SolidJS, Next.js, Node.js, Express, Spring Boot, FastAPI, Redux Toolkit, PostgreSQL, MongoDB, SQLite, REST APIs, Microservices, MVC

Developer Tools: Docker, Git, GitHub, GitLab, Linux, AWS, Jest, JUnit, Mockito, Pytest, Android SDK, CI/CD
